

Analytics Engineering Fellowship Assessment

Round 1 - SQL

Welcome to the Assessment

Thank you for applying to join our Analytics Engineering team! This exercise is designed to evaluate your ability to tackle real-world data challenges in analytics engineering. You will work with datasets related to **subscriptions** in a **SaaS application**. The datasets are intentionally provided without explanations of its schema or what columns or rows refer to.

Looking at the datasets, we know you'll have a lot of questions that you'd want to ask the examiner, but don't feel frustrated; this is all about assumptions; we want you to assume, but make sure that you backup your assumptions with evidence from the data, and the datasets are designed with patterns to validate your assumptions, so work hard to detect the patterns.

Important Tip

If you are unfamiliar with SaaS applications, SaaS subscription models, or common SaaS metrics, we strongly recommend reviewing relevant articles or watching explanatory videos on the topic. Understanding these concepts is critical for interpreting the dataset effectively.

Email Attachment

In the email you received, you should find two CSVs attached that have datasets about subscriptions in a SaaS application ("subscriptions" & "updated_subscriptions"). Use these CSV datasets to solve the assessment according to the assessment requirements.

Assessment Duration & Deadline

Please complete and submit the assessment within five days of receiving this email. The assessment period is as follows:

Start Date: 2025-09-11

Deadline Date: 2025-09-16 (Until end of the day, **12:00 AM 17th**)

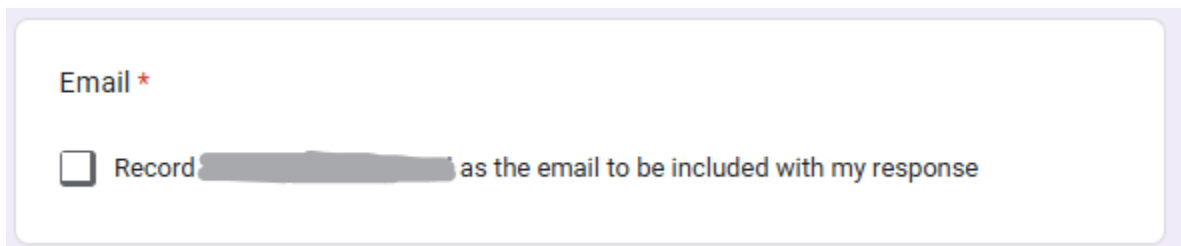

Assessment Guidelines

The assessment sections and questions will be presented in a Google form. Also, the candidate's answers and submissions should be added in the answer fields in the form.

Some of the questions require you to write a textual answer, and some require numerical answers which also require you to submit a complementary SQL query as an answer to how you got to this number. For the SQL answers, feel free to write your queries in any query tool, then copy and paste them inside the Google form field with the same SQL formatting.

Important notes about the assessment's Google form

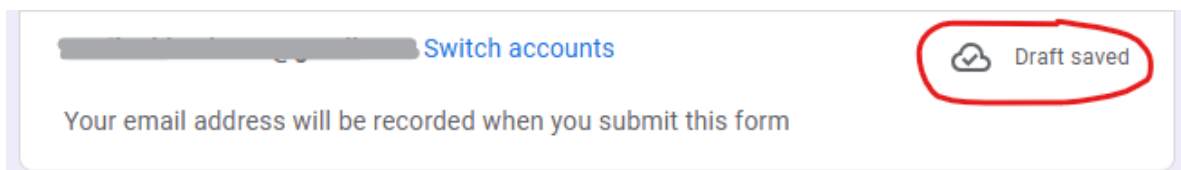

1. The form is only accessible to the candidate with the Gmail he/she applied with.

Email *

☐ Record [redacted] as the email to be included with my response

2. The form access is valid only during the specified duration of the assessment, then the link will expire and we will not be able to receive any new submissions.
3. The form autosaves your work (as long as you are online), so if for any reason, the form closes, you won't lose your progress and your answers will still be there, you just need to reopen the form link. This gives you the freedom to solve the assessment in multiple sessions within the assessment duration days; you don't have to submit everything in one go.

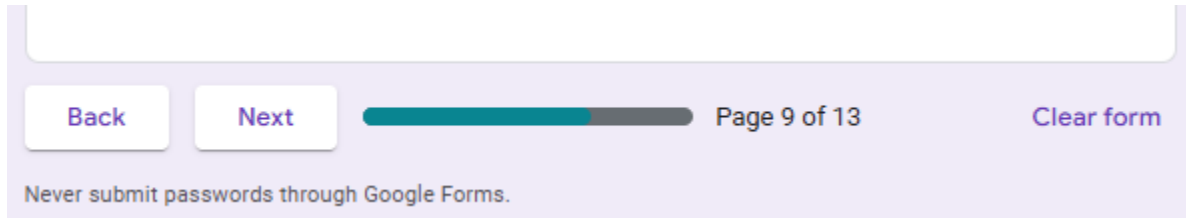

[redacted] Switch accounts

 Draft saved

Your email address will be recorded when you submit this form

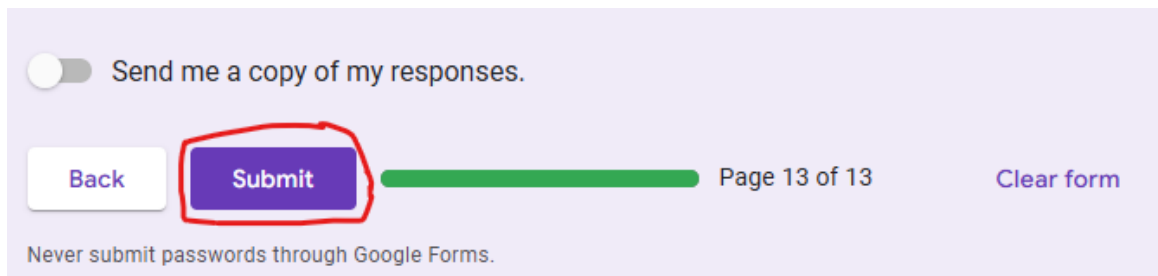

4. You can navigate the form pages (questions) freely from the beginning to the end without having to answer any questions. This gives you the freedom to navigate the whole assessment, understand the full context, see all questions, and make up your mind about which order you want to follow to answer the questions, or even skip some questions if you can't answer them at all.

This is easily doable by clicking on the **Back & Next** buttons at the bottom of each page.

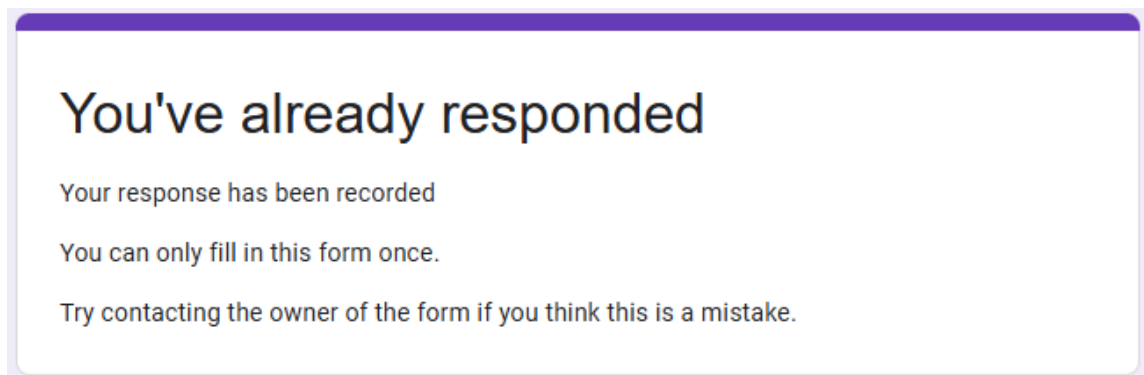

A screenshot of the Google Forms navigation bar at the bottom of a form page. It features a light purple background. On the left, there are two buttons: 'Back' and 'Next', both with purple text. To their right is a progress bar that is partially filled with teal. Further right, the text 'Page 9 of 13' is displayed. On the far right, there is a 'Clear form' link in purple. Below the navigation bar, a small warning message reads: 'Never submit passwords through Google Forms.'

5. You are eligible for one submission only, so make sure that you've revised all your answers before clicking the submit button, because if you try to reopen the link after submission, you'll be prompted that you can only fill this form once, and there is no option to modify your answers.

A screenshot of the Google Forms navigation bar at the bottom of a form page, specifically at the final page. It features a light purple background. At the top left, there is a toggle switch that is currently turned off, followed by the text 'Send me a copy of my responses.' Below this, there are two buttons: 'Back' and 'Submit'. The 'Submit' button is highlighted with a red rectangular box. To the right of the buttons is a green progress bar that is fully filled. Further right, the text 'Page 13 of 13' is displayed. On the far right, there is a 'Clear form' link in purple. Below the navigation bar, a small warning message reads: 'Never submit passwords through Google Forms.'

A screenshot of a message box with a purple header bar. The message is titled 'You've already responded' in a large, bold, black font. Below the title, there are three lines of text in a smaller, regular black font: 'Your response has been recorded', 'You can only fill in this form once.', and 'Try contacting the owner of the form if you think this is a mistake.'
